Hatchet-Gary Paulsen 2009-08-25 Celebrate the thirtieth anniversary of the Newbery Honor-winning survival novel Hatchet with a pocket-sized edition perfect for travelers to take along on their own adventures. This special anniversary edition includes a new introduction and commentary by author Gary Paulsen, pen-and-ink illustrations by Drew Willis, and a water resistant cover. Hatchet has also been nominated as one of America's best-loved novels by PBS's The Great American Read. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

The Hair Book-Graham Tether 2019-01-22 "A celebration of hair--and all the things you can do with it!"-- The Jade Peony-Wayson Choy 2009-12-01 Three siblings tell the stories of their very different childhoods in Vancouver's Chinatown before and during World War II.

A Century of Innovation-3M Company 2002 A compilation of 3M voices, memories, facts and experiences from the company's first 100 years.

The Dog Who Wouldn't Be-Farley Mowat 2018-10-05 First published in 1957, this is one of those classic dog books that everyone who ever read it remembers. Much as they remember the great Canadian novelist Farley Mowat - for his wry humor, his marvelous use of language (his father was a librarian), his passion for animals in all forms and the outdoors in all its glory, and his seemingly endless series of misadventures.

Python Programming-John M. Zelle 2004 This book is suitable for use in a university-level first course in computing (CS1), as well as the increasingly popular course known as CS0. It is difficult for many students to master basic concepts in computer science and programming. A large portion of the confusion can be blamed on the complexity of the tools and materials that are traditionally used to teach CS1 and CS2. This textbook was written with a single overarching goal: to present the core concepts of computer science as simply as possible without being simplistic.

Small Favor-Jim Butcher 2009-03-03 In this novel in Jim Butcher's #1 New York Times bestselling series, an old debt puts Chicago wizard Harry Dresden in harms way... Harry's life finally seems to be calming down. The White Council's war with the vampiric Red Court is easing up, no one's tried to kill him lately, and his eager apprentice is starting to learn real magic. For once, the future looks fairly bright. But the past casts one hell of a long shadow. Mab, monarch of the Sidhe Winter Court, calls in an old favor from Harry. Just one small favor he can't refuse...one that will trap Harry Dresden between a nightmarish foe and an equally deadly ally, and one that will strain his skills—and loyalties—to their very limits. And everything was going so well for once...

Moon! Earth's Best Friend-Stacy McAnulty 2019-06-11 From writer Stacy McAnulty and illustrator Stevie Lewis, Moon! Earth's Best Friend is a light-hearted nonfiction picture book about the formation and history of the moon—told from the perspective of the moon itself. Meet Moon! She's more than just a rock—she's Earth's rock, her best friend she can always count on. Moon never turns her back on her friend (literally: she's always facing Earth with the same side!). These two will stick together forever. With characteristic humor and charm, Stacy McAnulty channels the voice of Moon in this next celestial "autobiography" in the Our Universe series. Rich with kid-friendly facts and beautifully brought to life by Stevie Lewis, this is an equally charming and irresistible companion to Earth! My First 4.54 Billion Years and Sun! One in a Billion.

It's Only Stanley-Jon Agee 2015-03-17 Fans of Jon Klassen and Oliver Jeffers will love this mischievously funny read-aloud from award-winning author/illustrator Jon Agee Mysterious noises keep waking up the Wimbledon family. "That's very odd," says Mr. Wimbledon each time, but when he returns from checking on the sounds, he's always reassuring: "It's only Stanley; he's fixing the oil tank." "It's only Stanley; he's clearing the bathtub drain." But what Stanley the dog is actually doing while his oblivious family goes back to bed is deliciously absurd: he's turning the house into a rocket ship to zoom himself and his family to another planet for an alien encounter. This is a perfect rhyming read-aloud for fans of irreverent tales like Click Clack Moo and I Want My Hat Back.

Daily Reading Comprehension-Camille Liscinsky 2010 Provide your students with frequent, focused skills practice with this Reproducible Teacher's Edition. The reproducible format and additional teacher

resources give you everything you need to help students master and retain basic skills.

The Bear in the Attic-Patrick F. McManus 2003-06-01 The beloved humorist and bestselling author returns with his most riotous collection of essays to date. Overflowing with his trademark outdoorsman's wit, Patrick F. McManus's newest collection ponders the strange allure of the RV, the existential implications of being lost, the baffling tendency of animals to outsmart those who wish to hunt them, and the singular pleasure of doubling the size of every fish one doesn't actually catch. Combining the curmudgeonly voice of Dave Barry and the sly humor of Garrison Keillor, McManus brilliantly captures the everyday absurdities that comprise our existence. Alongside his humor, McManus's inimitable vision consistently evokes a childlike wonder at the natural world. Even if we are running low on food, the compass is broken, and we are fairly certain we have just spotted a family of Sasquatches frolicking in the treetops, The Bear in the Attic makes the outdoors seem irresistible.

The Sixth Extinction-Elizabeth Kolbert 2014-02-11 ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In The Sixth Extinction, two-time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamanian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

The Symbolic Species: The Co-evolution of Language and the Brain-Terrence W. Deacon 1998-04-17 "A work of enormous breadth, likely to pleasantly surprise both general readers and experts."—New York Times Book Review This revolutionary book provides fresh answers to long-standing questions of human origins and consciousness. Drawing on his breakthrough research in comparative neuroscience, Terrence Deacon offers a wealth of insights into the significance of symbolic thinking: from the co-evolutionary exchange between language and brains over two million years of hominid evolution to the ethical repercussions that followed man's newfound access to other people's thoughts and emotions. Informing these insights is a new understanding of how Darwinian processes underlie the brain's development and function as well as its evolution. In contrast to much contemporary neuroscience that treats the brain as no more or less than a computer, Deacon provides a new clarity of vision into the mechanism of mind. It injects a renewed sense of adventure into the experience of being human.

Professor Naismith's New Game-Jessica Van Dessel 2018 Have you ever gotten bored when the weather is too bad to go outside for recess? Bored students and bad weather inspired James Naismith to invent the game of basketball in the late 19th century. Using a soccer ball and peach baskets, Professor Naismith worked out the rules of the new sport at the local YMCA.

Beyond the One Room School-P. Bruce Uhrmacher 2011-10-19 The purpose of this book is to showcase K-12 unique and educational significant activities that we may all learn from. The essays in the book, under girded by sound research, highlight remarkable activities that are already taking place around the world. The essays offer a detailed description of a classroom or a school; provide an interpretation of what is taking place in this setting and why; and inform readers about what can be learned from the setting. Some readers will appreciate the vivid descriptions, which will encourage them to push their own

thinking. Others may learn from the author's discussion of essential ideas from the essay, which can be reflected upon and transferred into other situations. All readers are likely to appreciate hearing about the varied and creative activities. The stories of these noteworthy teachers fall into four categories: risk-taking, creativity, care and community, and interconnectedness. Within these themes are ideas that teachers can use to create their own remarkable classrooms. Each theme is discussed and then several examples of how the theme plays out in the educational setting are described.

Stories to Solve-George Shannon 2000-05-03 How can a thirsty crow drink from an almost-empty pitcher? How does arresting a stone help a judge find a boy's stolen money? This artfully illustrated book presents fourteen intriguing mysteries from world folklore. Each brain-teasing tale is followed by a simple explanation of the solution, while notes at the back of the book describe the origins of these classic mysteries.

Woodsong-Gary Paulsen 1990 For a rugged outdoor man and his family, life in northern Minnesota is a wild experience involving wolves, deer, and the sled dogs that make their way of life possible. Includes an account of the author's first Iditarod, a dogsled race across Alaska.

Date-onomics-Jon Birger 2015-08-25 It's not that he's just not that into you—it's that there aren't enough of him. And the numbers prove it. Using a combination of demographics, statistics, game theory, and number-crunching, Date-onomics tells what every single, college-educated, heterosexual, looking-for-a-partner woman needs to know: The "man deficit" is real. It's a fascinating, if sobering read, with two critical takeaways: One, it's not you. Two, knowledge is power, so here's what to do about it. The shortage of college-educated men is not just a big-city phenomenon frustrating women in New York and L.A. Among young college grads, there are four eligible women for every three men nationwide. This unequal ratio explains not only why it's so hard to find a date, but a host of social issues, from the college hookup culture to the reason Salt Lake City is becoming the breast implant capital of America. Then there's the math that says that a woman's good looks can keep men from approaching her—particularly if they feel the odds aren't in their favor. Fortunately, there are also solutions: what college to attend (any with strong sciences or math), where to hang out (in New York, try a fireman's bar), where to live (Colorado, Seattle, "Man" Jose), and why never to shy away from giving an ultimatum.

The Fifth Discipline-Peter M. Senge 2010-03-31 Completely Updated and Revised This revised edition of Peter Senge's bestselling classic, *The Fifth Discipline*, is based on fifteen years of experience in putting the book's ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization's ability to learn faster than the competition. The leadership stories in the book demonstrate the many ways that the core ideas in *The Fifth Discipline*, many of which seemed radical when first published in 1990, have become deeply integrated into people's ways of seeing the world and their managerial practices. In *The Fifth Discipline*, Senge describes how companies can rid themselves of the learning "disabilities" that threaten their productivity and success by adopting the strategies of learning organizations—ones in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create results they truly desire. The updated and revised Currency edition of this business classic contains over one hundred pages of new material based on interviews with dozens of practitioners at companies like BP, Unilever, Intel, Ford, HP, Saudi Aramco, and organizations like Roca, Oxfam, and The World Bank. It features a new Foreword about the success Peter Senge has achieved with learning organizations since the book's inception, as well as new chapters on Impetus (getting started), Strategies, Leaders' New Work, Systems Citizens, and Frontiers for the Future. Mastering the disciplines Senge outlines in the book will:

- Reignite the spark of genuine learning driven by people focused on what truly matters to them
- Bridge teamwork into macro-creativity
- Free you of confining assumptions and mindsets
- Teach you to see the forest and the trees
- End the struggle between work and personal time

Model Code of Judicial Conduct-American Bar Association 2007

A Doubter's Almanac-Ethan Canin 2016-02-16 NEW YORK TIMES BESTSELLER • In this mesmerizing novel, Ethan Canin, the author of *America America* and *The Palace Thief*, explores the nature of genius, rivalry, ambition, and love among multiple generations of a gifted family. Milo Andret is born with an unusual mind. A lonely child growing up in the woods of northern Michigan in the 1950s, he gives little thought to his own talent. But with his acceptance at U.C. Berkeley he realizes the extent, and the risks, of his singular gifts. California in the seventies is a seduction, opening Milo's eyes to the allure of both ambition and indulgence. The research he begins there will make him a legend; the woman he meets there—and the rival he meets alongside her—will haunt him for the rest of his life. For Milo's brilliance is entwined with a dark need that soon grows to threaten his work, his family, even his existence. Spanning seven decades as it moves from California to Princeton to the Midwest to New York, *A Doubter's Almanac* tells the story of a family as it explores the way ambition lives alongside destructiveness, obsession alongside torment, love alongside grief. It is a story of how the flame of genius both lights and scorches every generation it touches. Graced by stunning prose and brilliant storytelling, *A Doubter's Almanac* is a surprising, suspenseful, and deeply moving novel, a major work by a writer who has been hailed as "the most mature and accomplished novelist of his generation." Praise for *A Doubter's Almanac* "551 pages of bliss . . . devastating and wonderful . . . dazzling . . . You come away from the book wanting to reevaluate your choices and your relationships. It's a rare book that can do that, and it's a rare joy to discover such a book."—*Esquire* "[Canin] is at the top of his form, fluent, immersive, confident. You might not know where he's taking you, but the characters are so vivid, Hans's voice rendered so precisely, that it's impossible not to trust in the story. . . . The delicate networks of emotion and connection that make up a family are illuminated, as if by magic, via his prose."—*Slate* "Alternately explosive and deeply interior."—*New York ("Eight Books You Need to Read")* "A blazingly intelligent novel."—*Los Angeles Times* "[A] beautifully

written novel.”—The New York Times Book Review (Editors’ Choice) “A book that raises the bar for novelists.”—Literary Hub “No knowledge of proofs or theorems is required to enjoy Ethan Canin’s excellent eighth novel. He alternately treats math like elegant poetry or infuses it with crackling energy.”—The Christian Science Monitor “Math made beautiful . . . Canin writes with such luxuriant beauty and tender sympathy that even victims of Algebra II will follow his calculations of the heart with rapt comprehension.”—The Washington Post “A masterful writer at his transcendent best.”—BBC “Elegant and devastating . . . A Doubter’s Almanac is exquisitely crafted. Canin takes us readers deep into the strange world of his troubled characters without ever making us aware of the effort involved. . . . An odd and completely captivating novel.”—NPR’s Fresh Air “Dazzlingly ambitious . . . one part intellectual thriller, one part domestic saga.”—The Huffington Post From the Hardcover edition.

CPO Focus on Life Science-CPO Science (Firm) 2007

Inside the Cold War-Chris Adams 2004-12-01 General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

The Circuit-Francisco Jiménez 1999-10-25 "'La frontera'...I heard it for the first time back in the late 1940s when Papa and Mama told me and Roberto, my older brother, that someday we would take a long trip north, cross la frontera, enter California, and leave our poverty behind." So begins this honest and powerful account of a family's journey to the fields of California -- to a life of constant moving, from strawberry fields to cotton fields, from tent cities to one-room shacks, from picking grapes to topping carrots and thinning lettuce. Seen through the eyes of a boy who longs for an education and the right to call one place home, this is a story of survival, faith, and hope. It is a journey that will open readers' hearts and minds.

My Dog May Be a Genius-Jack Prelutsky 2008-02-26 Have you ever encountered an underwater marching band, a pig in a bathing suit, a pet orangutan, or a witch in a hardware store? Have you ever sat with a skunk in a courtroom, shopped for a dinosaur, or conversed with a Bupple, a Wosstrus, a Violinnet, or a Celloon? You will have, once you’ve read this exuberant collaboration from Jack Prelutsky and his "partner in crime"* James Stevenson. The "reigning czars of silliness"* have once again teamed up to bring readers an irresistible collection of poems that will have tongues twisting, imaginations soaring, and sides aching with laughter. The result is genius, indeed. *Publishers Weekly (starred review)
