EU Treaties and the Judicial Politics of National Courts-Pablo José Castillo Ortiz 2015-08-11 Cases such as the Maastricht ruling by the German Federal Constitutional Court or the 'Crotty; decision by the Irish Supreme Court have gone down in the history of European integration as outstanding examples of intervention by judicial actors in important political processes. In this book, Dr. Castillo Ortiz makes for the first time a comprehensive analysis of all such rulings by national higher courts on European Union treaties issued during their processes of ratification. Using an interdisciplinary Law and Politics approach and a sophisticated methodological strategy, the book describes the political dynamics underlying some of the most relevant judicial episodes in the process of European Integration during the last decades: litigation strategies by Europhile and Eurosceptic actors, relations between the judiciary and the other branches of government, and clashes of power between national courts and the European Court of Justice of the European Union. By offering empirical evidence and by relying on scientific rigor, the book seeks to provide both experts and the general public an accessible account of one of the most salient but least studied aspects of current European law and politics.

The Pick, the Spade and the Crow-Bill Rogers 2016-09-27 When the body of a man is discovered in woodlands outside Manchester, a ten-year missing-persons investigation can finally be filed away. But this was no ordinary death: gagged, bound and buried alive, he was the victim of a sophisticated and sadistic killer. And there is something else that has the National Crime Agency puzzled. A single character carved into a nearby tree. Newly promoted to the NCA's Behavioural Sciences Unit, Senior Investigator Joanne Stuart is determined to hunt down the perpetrator. Just as Jo's investigation begins to reveal links with other disappearances, there is another murder. This is no longer a cold case; she is dealing with the escalating violence of a chilling serial killer. Stepping into a sinister world of secrets, symbols and rituals, Jo will have to confront the legacy of her own past and the violent memories that lurk there if she is going to solve this case. But at what cost?

The Tangled Complexity of the EU Constitutional Process-Giuseppe Martinico 2012-11-08 Despite the rejection of the EU Constitutional Treaty eventually leading to the adoption of the Lisbon Treaty, the debates concerning the European Union's constitutional framework continue. This book builds on the discourse in European Union constitutionalism in order to offer a novel analysis of the EU's constitutional developments. Giuseppe Martinico sets out a unique account of EU constitutionalism which argues that the EU legal order is a complex entity which shares some features with natural systems. The book is soundly anchored in the theory and methodology of legal science and based on a deep knowledge of judicial practices. The author contends that Europe is still suffering from the failure of the Constitutional Treaty and is practicing the new institutional equilibrium afforded by the coming into force of the Reform Treaty. The book goes on to explore the methodological implications of such constitutional complexity for the study of EU law. The Tangled Complexity of the EU Constitutional Process will be of particular interest to academics and students in the disciplines of Law, International Relations and Political Science.

Riparian Areas-National Research Council 2002-10-10 The Clean Water Act (CWA) requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas--the lands bordering rivers and lakes--even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas, which has culminated in Riparian Areas: Functioning and Strategies for Management. The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values. The primary conclusion is that, because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal.

Instead, something far more unexpected awaits her: a strapping, gorgeous stranger who insists he's a centuries-old Celtic warrior. Seizing the Nonviolent Moments-Nancy Small 2015-01-08 Life is filled with opportunities to practice nonviolence. If we kept track, we'd be surprised at how often we get to choose a violent or nonviolent response to a given situation. Seizing these moments is a spiritual practice that shapes a nonviolent heart. Many people doing this together shapes the heart of a nonviolent world. This book is a humble and accessible approach to nonviolence based on the belief that no one is perfectly nonviolent. We are all works in progress. Each chapter presents an imaginative interpretation of a scripture story about seizing a nonviolent moment that sheds new light on nonviolence and its spirituality. Stories of contemporary peacemakers woven throughout offer lessons for living a spirituality of nonviolence for our times. Prophetic words from the US Catholic bishops emphasize the essential role of peacemaking in renewing the earth. Questions following each chapter inspire personal reflection and make the book a welcome resource for classrooms, parishes, and small groups. The more we seize the nonviolent moments in our lives, the more we are transformed by them. And the more we experience the power of nonviolence within ourselves, the more we believe in its potential to transform our troubled world.

Stronger Than Death-Manda Scott 2013-12-05 Medics have a way of organising cases. The first one you see is: 'in my experience'. Two becomes 'case after case'. Three is a series. In medicine, as in crime, three is the magic number that makes a syndrome real - or that turns death from a frightening accident,an unfortunate end to a night of heavy drinking, or a ridiculous overdose into a series. And that means the killer, too, has a label. Three men are dead, three colleagues with a shared past, a past also shared by the one person Kellen Stewart would trust with her life: pathologist Lee Adams. Suspect number one in this fast, hard-edged thriller. Set in Scotland, the action takes us to the rocks of the west coast and back to the farm in the Campsie Fells that is the location for the first two Kellen Stewart novels.
