Research in Attacks, Intrusions, and Defenses-Salvatore J. Stolfo 2013-10-23 This book constitutes the proceedings of the 16th International Symposium on Research in Attacks, Intrusions and Defenses, former Recent Advances in Intrusion Detection, RAID 2013, held in Rodney Bay, St. Lucia in October 2013. The volume contains 22 full papers that were carefully reviewed and selected from 95 submissions, as well as 10 poster papers selected from the 23 submissions. The papers address all current topics in computer security ranged from hardware-level security, server, web, mobile, and cloud-based security, malware analysis, and web and network privacy.

Linux Device Driver Development Cookbook-Rodolfo Giometti 2019-05-31 Over 30 recipes to develop custom drivers for your embedded Linux applications. Key Features Use Kernel facilities to develop powerful drivers Via a practical approach, learn core concepts of developing device drivers Program a custom character device to get access to kernel internals Book Description Linux is a unified kernel that is widely used to develop embedded systems. As Linux has turned out to be one of the most popular operating systems used, the interest in developing proprietary device drivers has also increased. Device drivers play a critical role in how the system performs and ensures that the device works in the manner intended. By offering several examples on the development of character devices and how to use other kernel internals, such as interrupts, kernel timers, and wait queue, as well as how to manage a device tree, you will be able to add proper management for custom peripherals to your embedded system. You will begin by installing the Linux kernel and then configuring it. Once you have installed the system, you will learn to use the different kernel features and the character drivers. You will also cover interrupts in-depth and how you can manage them. Later, you will get into the kernel internals required for developing applications. Next, you will implement advanced character drivers and also become an expert in writing important Linux device drivers. By the end of the book, you will be able to easily write a custom character driver and kernel code as per your requirements. What you will learn Become familiar with the latest kernel releases (4.19+/5.x) running on the ESPRESSObin devkit, an ARM 64-bit machine Download, configure, modify, and build kernel sources Add and remove a device driver or a module from the kernel Master kernel programming Understand how to implement character drivers to manage different kinds of computer peripherals Become well versed with kernel helper functions and objects that can be used to build kernel applications Acquire a knowledge of in-depth concepts to manage custom hardware with Linux from both the kernel and user space Who this book is for This book will help anyone who wants to develop their own Linux device drivers for embedded systems. Having basic hand-on with Linux operating system and embedded concepts is necessary.

Grandmaster Versus Amateur-Jacob Aagaard 2011 A multinational array of top grandmasters explain the difference in thinking between professional and amateur chess players, and how the amateur can bridge the gap. It usually takes at least a decade of sustained effort for even the most talented player to reach the grandmaster level this book cannot guarantee to make the reader a chess grandmaster, but it is certainly a healthy nudge in the right direction. The editors, ex-British Champion GM Jacob Aagaard and three-time Scottish Champion GM John Shaw, have recruited a line-up of strong grandmasters to share their wisdom.

Seafood Import Monitoring Program (Us National Oceanic and Atmospheric Administration Regulation) (Noaa) (2018 Edition)-The Law Library 2019-01-06 The Law Library presents the complete text of the Seafood Import Monitoring Program (US National Oceanic and Atmospheric Administration Regulation) (NOAA) (2018 Edition). Updated as of May 29, 2018 Pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), this final rule establishes permitting, reporting and recordkeeping procedures relating to the importation of certain fish and fish products, identified as being at particular risk of illegal, unreported, and unregulated (IUU) fishing or seafood fraud, in order to implement the MSA's prohibition on the import and trade, in interstate or foreign commerce, of fish taken, possessed, transported or sold in violation of any foreign law or regulation or in contravention of a treaty or a binding conservation measure of a regional fishery organization to which the United States is a party. Collection of catch and landing documentation for certain fish and fish products will be accomplished through the government-wide International Trade Data System (ITDS) by electronic submission of data through the Automated Commercial Environment (ACE) maintained by the Department of Homeland Security, Customs and Border Protection (CBP). The information will be collected through the ITDS electronic single window consistent with the Safety and Accountability for Every (SAFE) Port Act of 2006 and other applicable statutes. Specifically, this rule revises an existing NMFS requirement for the importer of record to file electronically through ACE data prescribed under certain existing NMFS programs (and to retain records supporting such filings) to also cover the data required to be reported under this rule. This rule requires data to be reported on the harvest of fish and fish products. In addition, this rule requires retention of additional supply chain data by the importer of record and extends an existing NMFS requirement to obtain an annually renewable International Fisheries Trade Permit (IFTP) to the fish and fish products regulated under this rule. The information to be reported and retained, as applicable, under this rule will help authorities verify that the fish or fish products were lawfully acquired by providing information to trace each import shipment back to the initial harvest event(s). The rule will also decrease the incidence of seafood fraud by requiring the reporting of this information to the U.S. Government at import and requiring retention of documentation so that the information reported (e.g., regarding species and harvest location) can be verified. This ebook contains: - The complete text of the Seafood Import Monitoring Program (US National Oceanic and Atmospheric Administration Regulation) (NOAA) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

Fiscal Policy with Fixed Nominal Exchange Rates-Christophe Chamley 1991 C^ote d'Ivoire's increase in debt in the 1980s (from 30 percent of GDP to 100

percent) did little for new investment, because the investment-GDP ratio barely compensated for inflation. The country's fiscal stance hurt the real exchange rate and international competitiveness.

Reid Railton-Karl Ludvigsen 2018-06-19 Reid Antony Railton, Cheshire-born automotive engineer par excellence, created an extraordinary range of cars. He rose to renown during the 1930s as chief engineer at Thomson & Taylor, Brooklands-based racing-car builders. There he realised the dreams of that era's top men of speed, including Tim Birkin, Malcolm Campbell, Whitney Straight, John Cobb, Raymond Mays and Goldie Gardner. His great cars powered them all to sensational racing and record-breaking success. This magisterial book, by one of the world's foremost automotive historians, tells Reid Railton's personal and professional story in superb detail and fascinating depth, with special focus on Reid's unique insights--amounting to genius--and technical accomplishments.

Modern Faith and Thought-Helmut Thielicke 1990-11 Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

The New Order-Chris Weitz 2015-07-21 They thought they were the only ones left. They were wrong. After the unexpected revelation at the end of the first book, Donna and Jefferson are separated. Jefferson returns to NYC and tries to bring a cure to the Sickness back to the Washington Square tribe, while Donna finds herself in England, facing an unimaginable new world. Can the two reunite and prevent an even greater disaster than the Sickness? This second book in The Young World trilogy will keep you at the edge of your seat.

Income and Democracy-Anke Hoeffler 2012-12-17 We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

English Electric Aircraft and Their Predecessors-Stephen Ransom 1987 The English Electric Company was established in 1918 to amalgamate the electrical and mechanical interests of a number of companies which included the Phoenix Dynamo Manufacturing Co and the Coventry Ordnance Works, both of which had produced their own aeroplanes.This work records the Phoenix and COW designs and other related types before dealing with those bearing the English Electric designation which began with the Wren of 1923 and continued into recent times with the Canberra and the Lightning. The design, development and histories of all these types are covered in the usual Putnam detail and there are production lists and service histories, including those of the United States-built Martin B-57 version of the Canberra. The authors were given full access to the company's archives and to the records of its most famous designer, W O Manning. Projects ranging from early flying boats to supersonic and VTOL airliners are listed, with many illustrated by three-view drawings. Some 250 photographs are also included. Stephen Ransom and Robert Fairclough have had a long association with English Electric and its descendants.
