Everyday Post-Socialism-Jeremy Morris 2016-09-01 This book offers a rich ethnographic account of blue-collar workers' everyday life in a central Russian industrial town coping with simultaneous decline and the arrival of transnational corporations. Everyday Post-Socialism demonstrates how people manage to remain satisfied, despite the crisis and relative poverty they faced after the fall of socialist projects and the social trends associated with neoliberal transformation. Morris shows the 'other life' in today's Russia which is not present in mainstream academic discourse or even in the media in Russia itself. This book offers co-presence and a direct understanding of how the local community lives a life which is not only bearable, but also preferable and attractive when framed in the categories of 'habitability', commitment and engagement, and seen in the light of alternative ideas of worth and specific values. Topics covered include working-class identity, informal economy, gender relations and transnational corporations.

A Book of the Beginnings-Gerald Massey 2007-09 After enjoying years as a popular journalist and poet, intellectual and freethinker Gerald Massey turned his vast studies in the field of Egyptology into A Book of the Beginnings, a bold statement that the origin of all civilization lays in ancient Egypt. His assertions, radical at the time-indeed, almost a century before the discovery of three-million-year-old human remains in Africa-resonate loudly today, when molecular biology is making corresponding discoveries alongside the still-raging creation-versus-evolution controversy. In Volume II, Massey intelligently argues an Egyptian origin for Biblical symbology, lexicography, and mythology. Here, he not only asks if the oldest Jewish and Christian axioms were really born on the banks of the Nile, he offers a stalwart and profound "Yes!" British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including The Natural Genesis and Ancient Egypt: The Light of the World.

A Russian Psyche-Alyssa W. Dinega 2001-12-10 Russian poet Marina Tsvetaeva's powerful poetic voice and her tragic life have often prompted literary commentators to treat her as either a martyr or a monster. Born in Russia in 1892, she emigrated to Europe in 1922, returned to the Soviet Union at the height of the Stalinist Terror, and committed suicide in 1941. Alyssa Dinega focuses on the poetry, rediscovering Tsvetaeva as a serious thinker with a coherent artistic and philosophical vision.
The Primary Classical Language of the World-Devaneya Pavanar 2017-09-12 'Tamil' is one of those words whose origin and root-meaning are wrapped up in mystery. All that we can say at present without any fear of contradiction is, that it is a pure Tamil word being current as the only name of the language of the Tamils, from the days that preceded the First Tamil Academy established at Thenmadurai on the river pahruli in the submerged continent. After some of the Vedic Aryans migrated to the South, Tamil got the descriptive name 'Tenmoli' lit. 'the southern language', in contradistinction to the Vedic language or Sanskrit which was called 'Vadamoli', lit. 'the northern language'. The word 'Tamil' or 'Tamilan' successively changed into 'Dramila', 'Dramila', 'Dramida' and 'Dravida' in North India and at first denoted only the Tamil language, as all the other Dravidian dialects separated themselves from Tamil or came into prominence one by one only after the dawn of the Christian era. That is why Sanskrit and Tamil came to be known as Vadamoi and Tenmoli respectively. This distinction could have arisen only when there were two languages standing side by side, one in the North and the other in the South, both coming in contact with each other. The Buddhist Tamil Academy which flourished in the 5th century at Madurai went by the name of 'Travida Sangam'.

Linguistic Profiles-Julia Kuznetsova 2015-08-31 The monograph investigates the relationship between form and meaning in different domains and centers on a group of methods referred to as "linguistic profiles" that have been developed recently by researchers at the University of Tromsø. These methods are based on the observation that there is a strong correlation between semantic and distributional properties of linguistic units. This book discusses grammatical, semantic, constructional, collostructional and diachronic profiles. Linguistic profiles as a group of methods are based on recent developments in the area of cognitive and functional linguistics: 1) form in language always has a relation to meaning, 2) a categorical approach to language is replaced with an understanding of language as a gradient phenomenon, which is investigated via statistics, 3) grammar is seen as a usage-based phenomenon. Throughout the book we see that each of the profiles determines a correlation between certain forms and certain meanings. By studying the distribution of different forms we can uncover the semantic restrictions standing behind them.
