MATHS PRACTICE 5-BPI Maths Practice book 1-6 are based broadly on the Mathematics syllabus Followed in schools all over the world the lessons in the books have carefully planned to strengthen the basic Maths concepts of young learners, A number of exercise have been included in the books which help children master the concepts sand develop logical thinking skills. These books also include revision exercises which help reinforce the concepts that children learn. The use of colorful and child-friendly illustrations makes the books attractive and interesting to work upon. Children will have a fun time exploring.

Algebra Workouts: Pre-Geometry-Tony G. Williams 2009-09-01 Add the vital warm-up process to your algebra lessons with these workouts designed to capture students[] interest and reinforce their skills. A broad range of concepts is covered from linear equations to factoring to pure fun. Each workout is easily reproducible and includes an answer key or mini-lesson demonstrating how to solve each problem. Essential teaching tips for the algebra classroom are also included.

e-O-Level Essential Study Guide Add Maths [Geometry & Trigonometry]-Cheng Chung Yu 2010-05-25 The Essential Study Guide Additional Mathematics series comes in three parts: Part 1: Focuses on the building up of the foundation in Algebra Part 2: Understanding the concepts in Geometry and Trigonometry Part 3: Focuses on Calculus (Differentiation and Integration) This series of books follows the latest curriculum. The author hopes to make the learning of Additional Mathematics less daunting and stressful. Students will be able to learn at their own pace and individual learning is made possible with the simple and yet detailed explanations of concepts.

 Algebra and Trigonometry with Analytic Geometry-Earl William Swokowski 1997 This Ninth Edition of Algebra and Trigonometry with Analytic Geometry has been improved in three important ways. First, discussions have been rewritten to enable students to more easily understand the mathematical concepts presented. Second, exercises have been added that require students to estimate, approximate, interpret a result, write a summary, create a model, explore, or find a generalization. Third, graphing calculators have been incorporated to a greater extent through the addition of examples and exercises as well as the inclusion of a cross-referenced appendix on the use of the TI-82/83. All of this has been accomplished without compromising the mathematical integrity that is the hallmark of this text.

 Number Power Review-Robert Mitchell 1993 Number Power Review is designed to help students brush up on basic computation and problem-solving skills--from whole numbers to beginning algebra. This book presents the core of mathematical skills considered most important in today's changing world. These are also the skills most likely to appear on state high school competency tests, on adult high school program tests, on the GED Test, and on pre-employment tests. Because of the importance of problem solving in all areas of math, Number Power Review discusses fifteen problem-solving strategies. These strategies are designed to help build the critical thinking skills students need today.

 Managerial Economics-Lila Jean Truett 1998 Designed for a one-semester course at the undergraduate or MBA level in managerial economics, this text also works well as a text/reference for a second course emphasizing cases. Managerial Economics takes a traditional neo-classical approach to managerial economics. It is a proven book with a reputation for concise and clear writing, correct presentation of economics, and outstanding end-of-chapter problems and cases. Its tried-and-true problem-solving approach helps students see how managers can use economic analysis to solve business problems and make better decisions.
