Violence and Gender Reexamined-Richard B. Felson 2002-01-01 This work challenges one of Western culture's most deeply-held assumptions: that violence against women is different from violence against men. Richard Felson argues that this type of violence is rarely the result of sexism or hatred against women and that sexism may actually inhibit violence against women. He cites research suggesting that the motives for violence against women are similar to the motives for violence against men: to control, to gain retribution, and to promote or defend self-image. These motives play a role in almost all violence, regardless of gender. Using a comparative method to determine how violence against women differs from violence against men, Felson illustrates not only that violence against women is less frequent than violence against men but also that our culture and legal system treat it more harshly. Contrary to the claims that the courts blame the victim in cases of violence against women, the author shows that the tradition of protection of women sometimes produces the opposite effect, and that it is due process and not sexism that makes, for instance, rape cases seem biased against women.

Battered Woman Syndrome as a Legal Defense-Brenda L. Russell 2014-01-10 The use of the battered woman syndrome defense in the courts is controversial, particularly when women turn to homicide in response to a partner's abuse. Scholars worry that the syndrome has created a standard to which all battered women are compared. This book provides a comprehensive examination of the evolution of the syndrome, its effectiveness in court, and the contributions made by psychologists and legal scholars to aid our understanding of the use of battered woman syndrome evidence in trials of abused women who kill. Of particular interest is the influence of history, gender roles, and stereotypes in the evaluation of defendants who claim to suffer from the syndrome.

Violence in American Drama-Alfonso Ceballos Muñoz, 2011-09-29 This interdisciplinary collection of 19 essays addresses violence on the American stage. Topics include the revolutionary period and the role of violence in establishing national identity, violence by and against ethnic groups, and females as perpetrators and victims, as well as state and psychological violence and violence within the family. The book works to assess whether representing violence may cause its cessation, or whether it generates further destruction. Featured playwrights include Susan Glaspell, Sophie Treadwell, Tennessee Williams, William Inge, Amiri Baraka, Luis Valdez, Cherríe Moraga, Sam Shepard, Tony Kushner, Neil LaBute, John Guare, Rebecca Gilman, and Heather MacDonald.

Domestic Violence and International Law-Bonita Meyersfeld 2010-03-23 Domestic Violence and International Law argues that certain forms of domestic violence are a violation of international human rights law. The argument is based on the international law principle that, where a state fails to protect a vulnerable group of people from harm, whether perpetrated by the state or private actors, it has breached its obligations to protect against human rights violation. This book provides a comprehensive legal analysis for why a state should be accountable in international law for allowing women to suffer extreme forms of domestic violence and how this can help individual victims. It is irrelevant that the violence is perpetrated by individuals and not state actors such as soldiers or the police. The state's breach of its responsibility is in its failure to act effectively in domestic violence cases; and in its silent endorsement of the violence, it becomes complicit. The book seeks to reformulate academic and political debate on domestic violence and the responsibility of states under international law. It is based on empirical data combined with an honest assessment of whether or not domestic violence is recognised by the international community as a human rights violation. 'Domestic Violence in International Law [...] provides an original, provocative, and much needed legal framework for the coherent development of a norm against domestic violence in international human rights law...Dr. Meyersfeld has developed a thoroughgoing analysis that asks and answers the most difficult questions often neglected by academics, lawyers and activists who dismiss the possibility that systemic violence against women could violate international law...Most fundamentally, this book is memorable for the hope and optimism it expresses about the transformative possibilities of international law. For without compromising such intensely human values as privacy, autonomy and cultural identity, Dr. Meyersfeld moves her reader with an abiding conviction: that international law, fueled with the power of transnational actors, can propel public actors to protect abused and vulnerable people in their most private worlds.' From the Foreword by Harold Koh, The Legal Adviser, United States Department of State (2009-).

Gender and Crime-Karen Heimer 2006 In the first comprehensive study of election law since the Supreme Court decided Bush v. Gore, Richard L. Hasen rethinks the Court's role in regulating elections. Drawing on the case files of the Warren, Burger, and Rehnquist courts, Hasen roots the Court's intervention in political process cases to the landmark 1962 case, Baker v. Carr. The case opened the courts to a variety of election law disputes, to the point that the courts now control and direct major aspects of the American electoral process. The Supreme Court does have a crucial role to play in protecting a socially constructed "core" of political equality principles, contends Hasen, but it should leave contested questions of political equality to the political process itself. Under this standard, many of the Court's most important election law cases from Baker to Bush have been wrongly decided.

Family Interventions in Domestic Violence-John Hamel, LCSW 2006-09-26 In this exciting new book John Hamel, author of the ground-breaking Gender-Inclusive Treatment of Intimate Partner Abuse, and Tonia Nicholls go beyond the traditional intervention theories of domestic violence practiced today. Offering alternative, unbiased and sometimes controversial views, theories, and current research, they, along with renowned contributors in the field, provide new treatment options that encompass a wide range of gender dynamics. Here are just some of the key principles covered: Interventions Should Be Based on a Thorough Unbiased Assessment Victim/Perpetrator Distinctions are Overstated, and Much Partner Abuse is Mutual Regardless of Perpetrator Gender, Child Witnesses to Partner Abuse are Adversely Affected, and are at Risk for Perpetrating Partner Abuse as Adults This new gender-inclusive approach to assessment and intervention provides a significant departure from traditional paradigms of domestic violence, and offers a much-needed awareness to effectively prevent violence in our communities today and for future generations.

Getting Played-Jody Miller 2008-03-01 2010 Distinguished Contribution to Scholarship Book Award from the American Sociological Association; Race, Gender, and Class Section 2008 Finalist, The Society for the Study of Social Problems C. Wright Mills Award Much has been written about the challenges that face urban African American young men, but less is said about the harsh realities for African American young women in disadvantaged communities. Sexual harassment, sexual assault, dating violence, and even gang rape are not uncommon experiences. In Getting Played, sociologist Jody Miller presents a compelling picture of this dire social problem and explores how inextricably, and tragically, linked violence is to their daily lives in poor urban neighborhoods. Drawing from richly textured interviews with adolescent girls and boys, Miller brings a keen eye to the troubling realities of a world infused with danger and gender-based violence. These girls are isolated, ignored, and often victimized by those considered family and friends. Community institutions such as the police and schools that are meant to protect them often turn a blind eye, leaving girls to fend for themselves. Miller draws a vivid picture of the race and gender inequalities that harm these communities—and how these result in deeply and dangerously engrained beliefs about gender that teach youths to see such violence—rather than the result of broader social inequalities—as deserved due to individual girls' flawed characters, i.e., she deserved it. Through Miller's careful analysis of these engaging, often unsettling stories, Getting Played shows us not only how these young women are victimized, but how, despite vastly

inadequate social support and opportunities, they struggle to navigate this dangerous terrain.

Advancing the Federal Research Agenda on Violence Against Women-National Research Council 2004-02-27 This report expands on the work of an earlier National Research Council panel whose report, *Understanding Violence Against Women*, was published in 1996. The report is based on the presentations and deliberations of a workshop convened in January 2002, at the request of Congress, to develop a detailed research agenda on violence against women. While some of the research recommendations in the earlier report have been funded and carried out, the workshop demonstrated that important gaps remain. For example, prevalence and incidence data are still inadequate to measure trends or to reveal whether interventions being designed under federal programs are, in fact, working. Among its primary recommendations, the committee underscored the importance of strengthening the data and research infrastructure in this area, especially the need for better prevalence data and longitudinal data to determine the causes of violent victimization of women and the impact of interventions.

What Women Want-Deborah L. Rhode 2014-08-01 *What Women Want* is a trenchant examination of the struggle for women's equality, and a prescription for what to focus on next in order to ensure maximum success. Feminism today is a movement that lacks leadership, unity, and definition, and it has gotten stuck in a boom and bust cycle when it comes to public opinion and action. Despite significant progress over the last fifty years, equality is still a distant goal in the political, social, and economic spheres. Only by identifying the barriers (both internal and external) that remain, Deborah Rhode argues, can we begin to identify solutions. A rigorously researched and well-written answer to the glut of gender-related books that have come onto the market recently, *What Women Want* comprehensively analyzes the challenges the feminist movement faces today. Combining sharp academic analysis and interviews with notable figures such as Sheryl Sandberg, Rhode focuses on five main topics: employment issues such as pay discrimination, work-life balance and the government's pitiful response, the assault on women's reproductive rights and the limits it places on their economic mobility, sexual harassment and violence, and the detrimental effect that the unfashionable label "feminist" can have, especially in attracting young women to the movement. Despite these formidable obstacles, the goals and principles of feminism are widely accepted by the American mainstream, and Rhode, herself a pathbreaker in the fields of law and education, offers effective strategies for redefining and advancing the feminist agenda, thereby creating a movement that truly recognizes, and is responsive to, what all women want.

Violent Offenders-Vernon L. Quinsey 2006 In this new edition, the authors update their review, focusing on the actuarial instruments they developed and described earlier and on the measures they have continued to develop. In their lively style, they review the commentary on risk appraisal, addressing 20 of the most common arguments against actuarial risk appraisal. They clarify how to score items of the Violence Risk Appraisal Guide (VRAG) and Sex Offender Risk Appraisal Guide (SORAG), based on extensive inquiries from professionals who use these instruments in the field. Lastly, they provide a more detailed description of the development of the SORAG.

Psychological Problems, Social Issues, and Law-Murray Levine 2007 The much-anticipated Second Edition of "Psychological Problems, Social Issues, and Law" offers updated research, legal cases, and new examples. The text uses historical and systems perspectives to examine the interaction between the social science community and the law. Each chapter contains a historical or a philosophical introduction to a problem, followed by discussion of the major legal issues and reviews of a wide range of research, including experimental literature. In addition to addressing many topics typically covered in psychology and law texts, Levine emphasizes social problems, dealing with issues such as abortion, intimate partner violence, divorce and custody, child protection, and more."

Scientific Jury Selection-Joel D. Lieberman 2007 "Given the importance of trial consultants to the modern-day practice of law, *Scientific Jury Selection* is designed to be informative for psychologists, other professionals interested in trial consulting (e.g., sociologists, communication experts, marketing researchers, psychiatrists, and social workers), and attorneys. The authors provide a thorough review of the most common techniques used to select jurors and a critical, social-science-based evaluation of the ultimate effectiveness of these methods. The nature and mechanics of the voir dire process, the use of community surveys, and the influence of demographic factors on scientific jury selection are among the many topics given a close examination by the two authors, who are pioneers in the field. Psychologists and other social scientists as well as practicing trial consultants who read the book will gain a better understanding of the current state of research relevant to scientific jury selection, emerging trends, and areas in which new research needs to be conducted to advance the field. Attorneys who read the book will be better positioned to decide whether to hire consultants to assist in future litigation, and if so, what types of services these consultants should provide"--Jacket. Violence, Aggression & Coercive Actions-James T. Tedeschi 1994-01-01 In [this book, the authors] describe a provocative theory that focuses on social conflicts and the concepts of power, influence, social identity, and retributive justice. They begin with a thorough examination and critique of the traditional theories of aggression, including biological, physiological, and criminological perspectives. They go on to synthesize key findings of these and other theoretical perspectives to support and define their own social interactionist theory of aggression that explores face-to-face confrontations and the intent of the aggressor's particular actions. "Violence, Aggression, and Coercive Actions" offers a new interdisciplinary approach to the study of aggression that is rooted in social and psychological perspectives. [The authors] present a strong theoretical foundation for practical analysis and intervention. Particularly thought provoking are discussions surrounding pornography, television, and other media violence; sexual coercion; and parenting styles (contrasting the use of abusive discipline with normal deterrents).

Reexamining Customary International Law-Brian D. Lepard 2017-02-16 *Reexamining Customary International Law* takes on the complex issues and controversies surrounding the history, theory, and practice of customary international law as it reexamines customary law's increasingly important role in world affairs. It incorporates the expertise of distinguished authors to probe many difficult issues that remain unresolved concerning the doctrine of customary law. At the same time, this book engages in a profound exploration of the practical role of customary international law in a variety of important fields, including humanitarian law, human rights law, and air and space law.

Male Roles, Masculinities and Violence-Expert Group Meeting on Male Roles and M 2000 This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression. Ruminations on Violence-Derek Pardue 2008 The goal of this volume is to discuss and analyze various contours of violence as it is made manifest around the world. This foundational collection of essays, stories, and poems represent a wide variety of disciplines and perspectives. The unifying theme is that violence is

not a thing, but rather a dynamic force occurring among separate, conscious minds that is enhanced by the careful scrutiny of social science.

A Troubled Marriage-Leigh Goodmark 2013-11-01 Choice's Outstanding Academic Title list for 2013 The development of a legal regime to combat domestic violence in the United States has been lauded as one of the feminist movement's greatest triumphs. But, Leigh Goodmark argues, the resulting system is deeply flawed in ways that prevent it from assisting many women subjected to abuse. The current legal response to domestic violence is excessively focused on physical violence; this narrow definition of abuse fails to provide protection from behaviors that are profoundly damaging, including psychological, economic, and reproductive abuse. The system uses mandatory policies that deny women subjected to abuse autonomy and agency, substituting the state's priorities for women's goals. A Troubled Marriage is a provocative exploration of how the legal system's response to domestic violence developed, why that response is flawed, and what we should do to change it. Goodmark argues for an anti-essentialist system, which would define abuse and allocate power in a manner attentive to the experiences, goals, needs and priorities of individual women. Theoretically rich yet conversational, A Troubled Marriage imagines a legal system based on anti-essentialist principles and suggests ways to look beyond the system to help women find justice and economic stability, engage men in the struggle to end abuse, and develop community accountability for abuse.

When Time Warps-Megan Burke 2019-10-15 An inquiry into the phenomenology of "woman" based in the relationship between lived time and sexual violence Feminist phenomenologists have long understood a woman's life as inhibited, confined, and constrained by sexual violence. In this important inquiry, author Megan Burke both builds and expands on this legacy by examining the production of normative womanhood through racist tropes and colonial domination. Ultimately, Burke charts a new feminist phenomenology based in the relationship between lived time and sexual violence. By focusing on time instead of space, When Time Warps places sexualized racism at the center of the way "woman" is lived. Burke transports questions of time and gender outside the realm of the historical, making provocative new insights into how gendered individuals live time, and how their temporal existence is changed through particular experiences. Providing a potent reexamination of the theory of Simone de Beauvoir—while also bringing to the fore important women of color theorists and engaging in the temporal aspects of #MeToo—When Time Warps makes a necessary, lasting contribution to our understanding of gender, race, and sexual violence.

Gender and Law-Katharine T. Bartlett 2002 A law school textbook containing case law and commentary by feminist legal scholars. Compiled by Bartlett (Duke U. School of Law), Harris (U. of California at Berkeley School of Law), and Rhode (Stanford Law School), the text rejects the notion that women's issues can be separated from the general consideration of the implicit assumptions of legal

Family Law, Gender and the State-Alison Diduck 1999 This new text, cases and materials text on family law provides not only an explication of legal principle but also explores, primarily from a feminist perspective, some of the assumptions relating to gender, sexual orientation, class and culture underlying the law. It examines the ideology of the family and, in particular, the role of the law in contributing to and reproducing that ideology. Structured around the themes of welfare, equality and family privacy, the book aims to offer the benefits of a textbook while also giving students a wide-ranging set of materials for classroom discussion, using the case method to demonstrate how various issues might be resolved. As well as providing a firm grounding in family law, the text sets the law in its social and historical context and encourages a critical approach by students to the subject. It provides an ideal introduction to family law for undergraduates, but will be equally helpful for postgraduate students of family law for whom it provides a challenging set of materials accompanied by a theoretically rich set of ideas and arguments.

Alternatives to Violence-David A. Wolfe 1997 Motivated by the need to stop violence against women and children, the authors of this timely volume argue that the key to preventing interpersonal violence lies in education during that "window of opportunity" -- adolescence. The authors present a model designed to educate young people about the abuse of power and to assist them in forming egalitarian relationships. Their hope is that as healthier relationships are formed, the overall risk of violence against women and children is reduced and the foundation is laid for future, non-violent relationships.

Sexually Coercive Behavior-R. A. Prentky 2003 These articles were presented at a conference that was specifically designed to examine and evaluate efforts to manage sex offenders and to provide informed recommendations and guidance for research, legislation, and discretionary decisions within the criminal justice system. The authors discuss the state-of-the-art understanding of issues related to risk assessment, aetiology, statutory management, and public policy.
