How to Be Everything-Emilie Wapnick 2017-05-02 What do you want to be when you grow up? It's a familiar question we're all asked as kids. While seemingly harmless, the question has unintended consequences. It can make you feel like you need to choose one job, one passion, one thing to be about. Guess what? You don't. Having a lot of different interests, projects and curiosities doesn't make you a "jack-of-all-trades, master of none." Your endless curiosity doesn't mean you are broken or flaky. What you are is a multipotentialite: someone with many interests and creative pursuits. And that is actually your biggest strength. How to Be Everything helps you channel your diverse passions and skills to work for you. Based on her popular TED talk, "Why some of us don't have one true calling", Emilie Wapnick flips the script on conventional career advice. Instead of suggesting that you specialize, choose a niche or accumulate 10,000 hours of practice in a single area, Wapnick provides a practical framework for building a sustainable life around ALL of your passions. You'll discover: • Why your multipotentiality is your biggest strength, especially in today's uncertain job market. • How to make a living and structure your work if you have many skills and interests. • How to focus on multiple projects and make progress on all of them. • How to handle common insecurities such as the fear of not being the best, the guilt associated with losing interest in something you used to love and the challenge of explaining "what you do" to others. Not fitting neatly into a box can be a beautiful thing. How to Be Everything teaches you how to design a life, at any age and stage of your career, that allows you to be fully you, and find the kind of work you'll love.

The American Cinema-Andrew Sarris 1996-08-22 "The American Cinema is the Citizen Kane of film criticism, a brilliant book that elevated American directors from craftsmen to artists, launched the careers of numerous film critics, and shaped the aesthetics of a whole generation of viewers by providing new ways of looking at movies."--Emanuel Levy, author of George Cukor, Master of Elegance The auteur theory, of which film critic Andrew Sarris was the leading American proponent, holds that artistry in cinema can be largely attributed to film directors, who, while often working against the strictures of studios, producers, and scriptwriters, manage to infuse each film in their oeuvre with their personal style. Sarris's The American Cinema, the bible of auteur studies, is a history of American film in the form of a lively guide to the work of two hundred film directors, from Griffith, Chaplin, and von Sternberg to Mike Nichols, Stanley Kubrick, and Jerry Lewis. In addition, the book includes a chronology of the most important American films, an alphabetical list of over 6000 films with their directors and years of release, and the seminal essays "Toward a Theory of Film History" and "The Auteur Theory Revisited." Over twenty-five years after its initial publication, The American Cinema remains perhaps the most influential book ever written on the subject.
