Programming in MATLAB-Marc E. Herniter 2001 Perfect for use in a lab or by individuals, PROGRAMMING IN MATLAB® is designed to help anyone interested in electrical and computer engineering develop programming skills using MATLAB® as the programming language. The text is also applicable for those interested in utilizing MATLAB® in industry. MATLAB® is quickly surpassing C, BASIC, and Fortran in engineering departments as the programming language of choice (due to the many functions and toolboxes the program features). It allows the many students who use it to write complex programs to solve a variety of technical problems efficiently. Herniter offers a straightforward approach to learning the program, and assumes no prior exposure to MATLAB®. The book offers comprehensive instructions for programming in MATLAB®, including specific output results and numerous MATLAB® screen captures. Its use is ideal in a lab/lecture setting where readers can recreate examples and complete problem assignments. However, the text organization is also appropriate for use as a general reference guide for programming MATLAB®. Herniter introduces fundamental programming skills, then moves into solving basic problems using built-in MATLAB® functions, and finally into solving engineering problems using MATLAB®.

Ideology and the Social Sciences-Graham Kinloch 2000-06-30 The extent to which modern social science continues to reflect the subjective traits of authors and the contexts in which they operate, rather than the objective facts or insights they claim to develop, remains one of the most striking features of social science research and writing. Kinloch and Mohan provide a multidisciplinary and worldwide examination of the ties between the subjective traits of social scientists, the contexts in which they affect research, and the kinds of knowledge they produce. The essays fall into five general topic areas: major theoretical issues, research as ideology, the political context of ideology, major factors in the academic setting, and the relationship between personal biography and professional ideology. This book will be of greatest concern to scholars, students, and researchers involved with the sociology of knowledge, social theory and methods, comparative social science, and social problems.
