INTRODUCTION TO SOLID STATE PHYSICS, Second Edition-KUMAR, ARUN 2015-10-01 Introduction to Solid State Physics, in its Second Edition, provides a comprehensive introduction to the physical properties of crystalline solids. It explains the structure of crystals, theory of crystal diffraction and the reciprocal lattice. As the book advances, it describes different kinds of imperfections in crystals, bonding in solids, and vibration in one-dimensional monoatomic and diatomic linear lattice. Different theories of specific heat, thermal conductivity of solids and lattice thermal conductivity are thoroughly dealt with. Coverage also includes the free electron theory, band theory of solids and semiconductors. In addition, the book also describes in detail the magnetic properties of solids and superconductivity. Finally, the book includes discussions on lasers, nanotechnology and the basic principles of fibre optics and holography. Some new topics like cellular method, quantum Hall effect, de Haas van Alphen effect, Pauli paramagnetism and semiconductor laser have been added in the present edition of the book to make it more useful for the students. The book is designed to meet the requirements of undergraduate and postgraduate students of physics for their courses in solid state physics, condensed matter physics and material science. KEY FEATURES • Puts a conceptual emphasis on the subject. • Includes numerous diagrams and figures to clarify the concepts. • Gives step-by-step explanations of theories. • Provides chapter-end exercises to test the knowledge acquired.

Comprehensive English Grammar & Composition-SC Gupta 2018-04-20 This is the must have book for success in competitive exams. The comprehensive English grammar and composition is very good book for thorough preparation for the competitive exams. The book covers the entire syllabus for gaining clear concepts in English. It is an excellent book for grammar practice and has many exercises and detailed explanation. The book is very nice and explanation is very simple and good. The book is very helpful for the beginners also since it gives detailed explanations of the different concepts of English grammar.

Oracle 11gR2 RAC For Beginners-Arun Kumar 2019-10-18 Oracle RAC technology is the advance level of database which is designed to provide high availability and scalability. Oracle RAC is installed on multiple servers and it forms the foundation for database cloud. Build a Strong Foundation in Oracle grid, Clusterware Installation with this book for Beginners.- Introduction to clusterware technology- Oracle cluster node setup- Oracle 11g grid software installation- Setup two node RAC- Create first Oracle RAC database- Oracle RAC and ASM administration A strong RAC Beginners eBook for IT Professionals World Wide! Oracle RAC allows multiple computers to run Oracle RDBMS software simultaneously while accessing a single database, thus providing clustering. The main aim of Oracle RAC online course is to implement a clustered database to provide performance, scalability and resilience. It's a clustered version of Oracle Database based on a comprehensive high availability stack. The Oracle 11gR2 Real Application Clusters Administration eBook describes the Oracle RAC architecture, hands on experience and Oracle Real Application Clusters multi node installations. This eBook is for people who have prior knowledge on Oracle database administration and covers knowledge on topics like Oracle RAC Cluster, Oracle AMS, Oracle RAC administration, Oracle RAC Installation, Oracle RAC on VirtualBox and many more.

The Forever Court (Knights of the Borrowed Dark, Book 2)-Dave Rudden 2017-08-08 A young knight must fulfill his destiny in this second book in a trilogy perfect for fans of Ranger's Apprentice. The door between our world and the world of the dark has been blasted open. Now the Knights must face the court of the Endless King. Denizen finally feels like a true Knight, and the court has requested a meeting to thank him for saving the King's daughter. It's either an honor . . . or a trap. When the Knights encounter the members of the Forever Court, the meeting almost immediately dissolves into a battle. And that's not the worst of it. There is another order of people who can communicate with the monsters of the dark. A family who worship the dark. And they will stop at nothing to bring the shadows back to power.

All-In-one Oracle DBA Scripts-Arun Kumar 2019-09-05 This eBook is a collection of my real-time DBA

scripts that I use in daily database administration. You can simply copy paste these scripts and start using them immediately on any Oracle database. SCRIPTS INCLUDED INSIDE:

===== ASM Scripts- Auditing Scripts- CRSCTL & RAC Scripts- Database Info Scripts- Dataguard Monitoring Scripts- Database Monitoring Scripts- EXPDP / IMPDP Scripts- Flashback Scripts- Multitenant Scripts- Network Management Scripts- Object Management Scripts- OEM / Cloud Control Scripts- Partitioning Scripts- RMAN Scripts- Scheduler & Jobs- SRVCTL Scripts- Tablespace and User management scripts
DISCLAIMER: please execute all the scripts on a test server before executing on a production server. The scripts are for your reference purpose only and hope that it may be of use, but is not guaranteed to be correct, up to date or suitable for any particular purpose.

A Coffin From Hong Kong-James Hadley Chase 2013-12-14 It was the easiest £3,000 Nelson Ryan had ever made - but suddenly he realised he was being played for a sucker. A telephone call, seemingly innocent enough, led him to the murder of a Chinese call-girl who talked too much. It also pitched him straight into the teeming, sordid night life of colourful Hong Kong. From now on, Ryan would stick at nothing to get the killer who'd crossed him up.

Feel Free-Zadie Smith 2018-02-06 Winner of the 2018 National Book Critics Circle Award for Criticism A New York Times Notable Book From Zadie Smith, one of the most beloved authors of her generation, a new collection of essays Since she burst spectacularly into view with her debut novel almost two decades ago, Zadie Smith has established herself not just as one of the world's preeminent fiction writers, but also a brilliant and singular essayist. She contributes regularly to The New Yorker and the New York Review of Books on a range of subjects, and each piece of hers is a literary event in its own right. Arranged into five sections--In the World, In the Audience, In the Gallery, On the Bookshelf, and Feel Free--this new collection poses questions we immediately recognize. What is The Social Network--and Facebook itself--really about? "It's a cruel portrait of us: 500 million sentient people entrapped in the recent careless

thoughts of a Harvard sophomore." Why do we love libraries? "Well-run libraries are filled with people because what a good library offers cannot be easily found elsewhere: an indoor public space in which you do not have to buy anything in order to stay." What will we tell our granddaughters about our collective failure to address global warming? "So I might say to her, look: the thing you have to appreciate is that we'd just been through a century of relativism and deconstruction, in which we were informed that most of our fondest-held principles were either uncertain or simple wishful thinking, and in many areas of our lives we had already been asked to accept that nothing is essential and everything changes--and this had taken the fight out of us somewhat." Gathering in one place for the first time previously unpublished work, as well as already classic essays, such as, "Joy," and, "Find Your Beach," *Feel Free* offers a survey of important recent events in culture and politics, as well as Smith's own life. Equally at home in the world of good books and bad politics, Brooklyn-born rappers and the work of Swiss novelists, she is by turns wry, heartfelt, indignant, and incisive--and never any less than perfect company. This is literary journalism at its zenith.

Arthrogryposis-Lynn T. Staheli 1998-04-28 The term arthrogryposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogryposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogryposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogryposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

A Children's History of India-Subhadra Sen Gupta 2015-07-29 Which were the first cities of India and how were they discovered? What was it like living in Mughal times? How did the British, who had come to trade in India, end up ruling the country? How has India changed after Independence? Delve into India's past to discover the answers to these questions and many more in this comprehensive history of our nation. Journey through time to visit the baths and palaces of the first cities of Harappa, the stupas of Ashoka and the flamboyant courts of the great Mughals, rich in art, culture and architecture. Learn how the revolution of 1857 really started and march alongside Gandhi on his quest for an India free from British rule. Plus, discover more about each period through fun and easy 'To do' activities. Told in simple, lucid prose and interspersed with beautiful illustrations, A Children's History of India makes learning history a fun and engaging experience for readers of all ages.

Linguistic Meaning (RLE Linguistics A: General Linguistics)-Keith Allan 2014-02-03 Dr Keith Allan presents a coherent, consistent and comprehensive account of linguistic meaning, centred around an informally presented theory of meaning. It is intended for graduate and undergraduate students of linguistics, or any linguist curious about what a theory of meaning should seek to accomplish and the way to achieve that aim. The work assumes that the primary task of a theory of linguistic meaning is to describe the meaning of speech acts. This in turn presupposes a theory of semantics and a theory of prosodic meaning, as well as a proper treatment of the co-operative principle, context and background information. These matters are dealt with in detail. The second task of a theory of linguistic meaning is to identify what meaning is, to explain the relationships between sense and denotation, and to explicate the

nature of meaningful properties and meaning relations. These matters are fully covered, and the work concludes with a summary of the principle arguments presented.

Constipation-Steven D. Wexner 2007-08-08 The only book to deal specifically with constipation for specialists has been updated to include all the new advances since the first edition (1995). These advances include biofeedback, surgery for constipation, sacral nerve stimulation, the use of laparoscopy for rectal prolapse, treatment and our understanding of some of the psychological problems of these patients. Innovations also include Professor Norman Williams' Malone Procedure and the newer pharmacologic treatments such as nitric oxide and botulinum toxin injections.

Wildlife and Emerging Zoonotic Diseases: The Biology, Circumstances and Consequences of Cross-Species Transmission-James E. Childs 2007-07-23 This volume offers an overview of the processes of zoonotic viral emergence, the intricacies of host/virus interactions, and the role of biological transitions and modifying factors. The themes introduced here are amplified and explored in detail by the contributing authors, who explore the mechanisms and unique circumstances by which evolution, biology, history, and current context have contrived to drive the emergence of different zoonotic agents by a series of related events.

Patient-Reported Outcomes in Performance Measurement-David Cella 2015-09-17 Patient-reported outcomes (PROs) are measures of how patients feel or what they are able to do in the context of their health status; PROs are reports, usually on questionnaires, about a patient's health conditions, health behaviors, or experiences with health care that individuals report directly, without modification of responses by clinicians or others; thus, they directly reflect the voice of the patient. PROs cover domains such as physical health, mental and emotional health, functioning, symptoms and symptom burden, and health behaviors. They are relevant for many activities: helping patients and their clinicians make informed decisions about health care, monitoring the progress of care, setting policies for coverage and

reimbursement of health services, improving the quality of health care services, and tracking or reporting on the performance of health care delivery organizations. We address the major methodological issues related to choosing, administering, and using PROs for these purposes, particularly in clinical practice settings. We include a framework for best practices in selecting PROs, focusing on choosing appropriate methods and modes for administering PRO measures to accommodate patients with diverse linguistic, cultural, educational, and functional skills, understanding measures developed through both classic and modern test theory, and addressing complex issues relating to scoring and analyzing PRO data.

Lectins-Nathan Sharon 2012-12-06 A characteristic property of most, or perhaps all, proteins is their ability to combine specifically and reversibly with various substances. Well known examples are enzymes that bind substrates and inhibitors, and antibodies that bind antigens. This book deals with lectins, a class of proteins that bind carbohydrates. Another characteristic property of lectins is that they agglutinate cells or precipitate polysaccharides and glycoproteins. This is because lectins are polyvalent, i.e. each lectin molecule has at least two carbohydrate binding sites to allow crosslinking between cells (by combining with sugars on their surfaces) or between sugar containing macromolecules. The agglutinating and precipitating activities of lectins are very similar to those of antibodies. They can likewise be specifically inhibited by low molecular weight compounds (haptens), which in the case of lectins are sugars or sugar containing compounds (Fig. 1.1). Not surprisingly, therefore, many of the methods used in lectin research are based on immunochemical techniques. Nevertheless, lectins are different from antibodies in several important aspects. Many lectins are found in plants, microorganisms and viruses, which do not synthesize immunoglobulins. In fact, they are found in almost all living organisms (Table 1.1) and are not confined to specific organs or tissues. Another marked difference between the two classes of compound is that antibodies are structurally similar, whereas lectins are structurally diverse. In general, lectins are oligomeric proteins composed of subunits, usually with one sugar binding site per subunit.

Cognitive and Linguistic Aspects of Geographic Space-Martin Raubal 2013-01-30 20 years ago, from July 8

to 20, 1990, 60 researchers gathered for two weeks at Castillo-Palacio Magalia in Las Navas del Marques (Avila Province, Spain) to discuss cognitive and linguistic aspects of geographic space. This meeting was the start of successful research on cognitive issues in geographic information science, produced an edited book (D. M. Mark and A. U. Frank, Eds., 1991, Cognitive and Linguistic Aspects of Geographic Space. NATO ASI Series D: Behavioural and Social Sciences 63. Kluwer, Dordrecht/Boston/London), and led to a biannual conference (COSIT), a refereed journal (Spatial Cognition and Computation), and a substantial and still growing research community. It appeared worthwhile to assess the achievements and to reconsider the research challenges twenty years later. What has changed in the age of computational ontologies and cyber-infrastructures? Consider that 1990 the web was only about to emerge and the very first laptops had just appeared! The 2010 meeting brought together many of the original participants, but was also open to others, and invited contributions from all who are researching these topics. Early-career scientists, engineers, and humanists working at the intersection of cognitive science and geographic information science were invited to help with the re-assessment of research needs and approaches. The meeting was very successful and compared the research agenda laid out in the 1990 book with achievements over the past twenty years and then turned to the future: What are the challenges today? What are worthwhile goals for basic research? What can be achieved in the next 20 years? What are the lessons learned? This edited book will assess the current state of the field through chapters by participants in the 1990 and 2010 meetings and will also document an interdisciplinary research agenda for the future.

Environmental Protection Strategies for Sustainable Development-Abdul Malik 2011-09-18 The environment of our planet is degrading at an alarming rate because of non-sustainable urbanization, industrialization and agriculture. Unsustainable trends in relation to climate change and energy use, threats to public health, poverty and social exclusion, demographic pressure and ageing, management of natural resources, biodiversity loss, land use and transport still persist and new challenges are arising.

Since these negative trends bring about a sense of urgency, short term action is required, whilst maintaining a longer term perspective. The main challenge is to gradually change our current unsustainable consumption and production patterns and the nonintegrated approach to policy-making. This book covers the broad area including potential of rhizospheric microorganisms in the sustainable plant development in anthropogenic polluted soils, bioremediation of pesticides from soil and waste water, toxic metals from soil, biological treatment of pulp and paper industry wastewater, sustainable solutions for agro processing waste management, solid waste management on climate change and human health, environmental impact of dyes and its remediation. Various methods for genotoxicity testing of environmental pollutants are also discussed and chapters on molecular detection of resistance and transfer genes in the environmental samples, biofilm formation by the environmental bacteria, biochemical attributes to assess soil ecosystem sustainability, application of rhizobacteria in biotechnology, role of peroxidases as a tool for the decolorization and removal of dyes and potential of biopesticides in sustainable agriculture. It offers a unique treatment of the subject, linking various protection strategies for sustainable development, describing the inter-relationships between the laboratory and field eco-toxicologist, the biotechnology consultant, environmental engineers and different international environmental regulatory and protection agencies.

Advances in Natural Language Processing-Bengt Nordstrom 2008-08-13 This volume contains the papers presented at GoTAL 2008, the 6th International Conference on NaturalLanguageProcessing, held on August 25-27,2008, at Chalmers University of Technology in Gothenburg, Sweden. GoTAL was the sixth conference in the TAL series, preceded by FracTAL 1997 (Universitede Franche-Comt e, Besan, con, France), VexTAL 1999 (Universita Ca' Foscari di Venezia, Venice, Italy), PorTAL 2002 (Universidade do Algarve, Faro, Por- gal), EsTAL 2004 (Universitat d'Alacant, Alicante, Spain), and FinTAL 2006 (University of Turku, Turku, Finland). The conference received 107 submissions. Each submission was reviewed by

three programme committee members or external reviewers. The committee- nally accepted 44 papers to be presented at the conference and included in the proceedings. The conference programme also included three invited talks, which are the ?rst three papers in this volume. We are grateful to the programme committee members and the external - viewers for their careful and punctual work. The sta? in the local organization team at Chalmers helped in a very professional way. The sponsors contributed, in particular, to the social programme planned for the conference. The invited speakers - Johan Bos, Lori Lamel, and Joakim Nivre - gave the scienti?c p- gramme the broad, yet focused, pro?le that we wanted to achieve. And ?nally, it is essentially the authors of the submissions that created the substance of the conference and this volume, with all their good papers and their cooperative attitude.

Diet, Nutrition, and the Prevention of Chronic Diseases-World Health Organization 2003-04-22 Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

Voice and Agency-Jeni Klugman 2014-09-29 Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of

women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

Whose Book is it Anyway?-Janis Jeffries 2019-03-12 Whose Book is it Anyway? is a provocative collection of essays that opens out the copyright debate to questions of open access, ethics, and creativity. It includes views – such as artist's perspectives, writer's perspectives, feminist, and international perspectives – that are too often marginalized or elided altogether. The diverse range of contributors take various approaches, from the scholarly and the essayistic to the graphic, to explore the future of publishing based on their experiences as publishers, artists, writers and academics. Considering issues such as intellectual property, copyright and comics, digital publishing and remixing, and what it means (not) to say one is an author, these vibrant essays urge us to view central aspects of writing and publishing in a new light. Whose Book is it Anyway? is a timely and varied collection of essays. It asks us to reconceive our understanding of publishing, copyright and open access, and it is essential reading for anyone invested in the future of publishing.

Education for the 21st Century - Impact of ICT and Digital Resources-Deepak Kumar 2006-10-11 It is a pleasure to offer you this book containing papers about ICT and education from the World Computer Congress 2006 (WCC 2006), held in Santiago, Chile and sponsored by the International Federation for Information Processing (IFIP). A lot of people worked very hard to make this event happen and to produce this book. The programme committee with IFIP members from around the world issued a call for papers inspiring almost 80 people to submit papers, posters, demonstrations, and workshops to the IFIP TC3

(Technical Committee on Education) sub-conference of WCC 2006. The submitted papers were reviewed by a large group of referees to select the papers to be presented at the conference. What is really amazing is that all these people freely contributed their time and effort to do all this work. The TC3 sub-conference of WCC 2006 has two themes: Informatics Curricula, TEaching Methods and best practice (ICTEM II), and Teaching and Learning with ICT: Theory, Policy and Practice. These themes represent many of the broad range of interests of the Working Groups of IFIP TC3. Two kinds of papers are included in this book: full papers and short papers. Full papers are standard papers that are appropriate for an international conference on ICT and informatics education. Of the 64 full paper submissions, 28 (44%) were accepted. A short paper represents work in progress, opinion, a proposal, work with untested results, or an experience report.

Molecular Gerontology-S.I. Rattan 2012-12-06 Esteemed researchers from different European laboratories provide state-of-the-art studies on biology and ageing, along with guidelines for future investigations. They cover such issues in molecular gerontological research as regulation of gene expression from DNA to RNA to functional proteins, origin of various age-associated diseases, genetic regulation of ageing and longevity, and different mechanisms of defense and repair. Other contributions evaluate new technologies, including transgenic organisms, and the use of nutritional and chemical modulators of ageing and lifespan.

Investigations and Applications of Severe Plastic Deformation-Terry C. Lowe 2012-12-06 Material processing techniques that employ severe plastic deformation have evolved over the past decade, producing metals, alloys and composites having extraordinary properties. Variants of SPD methods are now capable of creating monolithic materials with submicron and nanocrystalline grain sizes. The resulting novel properties of these materials has led to a growing scientific and commercial interest in them. They offer the promise of bulk nanocrystalline materials for structural; applications, including nanocomposites of lightweight alloys with unprecedented strength. These materials may also enable the

use of alternative metal shaping processes, such as high strain rate superplastic forming. Prospective applications for medical, automotive, aerospace and other industries are already under development.

The Epidemiology of Plant Diseases-D.G. Jones 2013-03-09 Most branches of science have what might be termed a 'core area' which is both related to and helps to integrate peripheral topics to form the overall subject area. Without this central link, the subject is simply a collection of disparate, albeit generally related topics. What genetics is to plant breeding, epidemiology is to the subject of plant pathology and, no matter what individual topic is considered, it is always possible to recognize the interaction with and relationship to epidemiological factors. Broadly speaking, until the 1950s, plant pathology was considered as the applied side of mycology and, indeed, the British Society of Plant Pathology was spawned from its mentor, the British Mycological Society, with considerable help from The Association of Applied Biology. However, with the exploding world population and the growing demand for food, plant pathologists became increasingly aware of the need for a more considered, measured, precise and even holistic approach to their subject and, particularly, to plant disease management. Looking back over 40 years of teaching and research in plant pathology, it was very clear that the 'core' of the subject was epidemiology and that this 'new' study was developing a very distinct identity which was rapidly being recognized in its own right. The 'shotgun' approach to plant disease 'control' was quickly perceived to be too inexact and almost every aspect of the subject was being reviewed, refined and advanced.

The Cambridge Handbook of English Historical Linguistics-Merja Kytö 2016-05-03 English historical linguistics is a subfield of linguistics which has developed theories and methods for exploring the history of the English language. This Handbook provides an account of state-of-the-art research on this history. It offers an in-depth survey of materials, methods, and language-theoretical models used to study the long diachrony of English. The frameworks covered include corpus linguistics, historical sociolinguistics, historical pragmatics and manuscript studies, among others. The chapters, by leading experts, examine the interplay of language theory and empirical data throughout, critically assessing the work in the field.

Of particular importance are the diverse data sources which have become increasingly available in electronic form, allowing the discipline to develop in new directions. The Handbook offers access to the rich and many-faceted spectrum of work in English historical linguistics, past and present, and will be useful for researchers and students interested in hands-on research on the history of English.

New Perspectives in Magnesium Research-Yoshiki Nishizawa 2007-03-06 A definitive review in the field of magnesium research, this book brings together the proceedings of the 11th International Magnesium Symposium in Osaka, Japan from October 22-26, 2006. Written by authorities in the area, the book provides a thorough overview of progress in the area of magnesium research. The author is one of the world's foremost magnesium researchers and reviewers, and the book provides essential reading for researchers in magnesium.
