The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration ion of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.</p> <p>Intermediate Comprehension Passages-Byrne Donn 1970-09</p> <p>Growth and International Trade-Karl Farmer 2013-02-01 This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. But when police name him the prime suspect in the brutal murder of his friend and employee, Adrian doesn't expect his best hope for romance to be assigned to the case... Detective Jake Riordan is hungry to climb the ranks. All he has to do for a promotion is nail the handsome bookstore owner for an obvious crime of passion. As Riordan's investigation heats up and the suspect insists on his innocence, the detective doubts both Adrien's guilt and his ability to resist the man's understated charms. Can they turn the crime into passion, or will a killer on the loose write The End?</p> <p>Copies in Seconds-David Owen 2008-06-30 The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.</p> <p>Agroindustrial Project Analysis-James E. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African "tradition" that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.</p> <p>The End of Sorrow-Ekmath Easwaran 1979-02-01 "This volume originally appeared in a hardcover edition ... under the title The Bhagavad Gita for daily living, chapters 1 through 6, published by the Blue Mountain Center of Meditation."--T.p. verso.</p> <p>The Screenplay Business-Peter Bloore 2013 The development of a film screenplay is a complex and evolutionary process, beginning with an initial story and continuing through drafting and financing to the start of the shoot. And yet the best ways of understanding and managing this process have never been properly studied. The Screenplay Business is the first book to do exactly that, addressing such questions as: How do film scripts get written, and what are the tensions between creativity and business? How can the team of the writer, producer, director and development executive work together most effectively? The Screenplay Business presents a theoretical and practical framework for understanding the business of independent script development, and encompasses ideas about creativity, motivation, managing creative people, value chains, and MBA leadership theories. This book will help producers and writers to nurture their stories through the long development process to the screen. It explains the international film business, and contains new research and extensive interviews with leading industry figures, including practical advice on how to run script meetings and handle notes; how to build a sustainable business; and how to understand what really happens when a script is written. The Screenplay Business is a new key text for academics and students researching film and media, and indispensable reading for anyone working in film screenplay development today.</p> <p>Words In The Dust-Trent Reedy 2013-03-01 Zulaikha hopes. Ellis 2011-08-31 "Charley Ellis has written a magnificent portrait, capturing the indomitable spirit of Joe Wilson and his instinctive understanding of the need for and commercial usefulness of a transforming imaging technology. Joe Wilson and his extraordinary team, which I had the good fortune to first meet in 1960, epitomized the wonderful observation of George Bernard Shaw who said, "Some look at things that are, and ask why? I dream of things that never were and ask why not? Xerox and xerography are not only a part of our vocabulary, but part of our everyday life. Charley Ellis gives the reader a poignant understanding of just how this happened through the life, adventures, critical business decisions, and dreams of Joseph Wilson and a cadre of remarkable individuals. This book will surely join the library of memorable biographies that capture the building of America into a risk-tolerant, technologically sophisticated, idea-oriented society that thrives by understanding what Charles Darwin really said: 'Survival will be neither to the strongest of the species, nor to the most intelligent, but to those most adaptable to change.'" —Frederick Frank, Vice Chairman, Lehman Brothers Inc.</p> <p>All She Ever Wanted-Lynn N.
